

## 2M/70CM SATELLITE ANTENNA ASSEMBLY

**ARRL** The National Association for  
Amateur Radio®

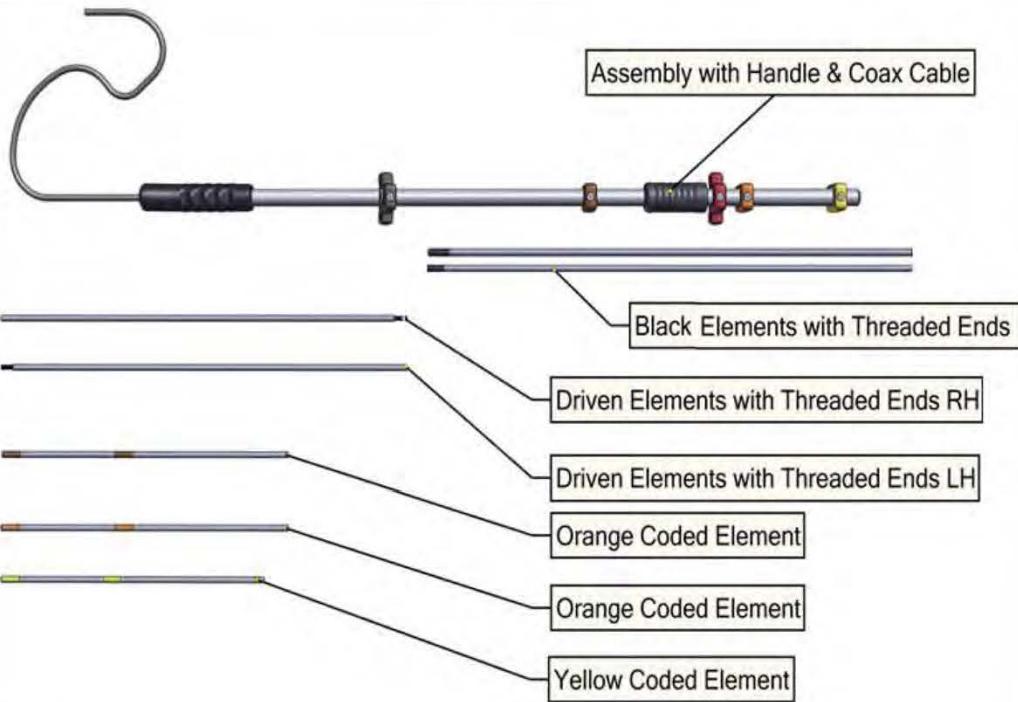

### **IMPORTANT**

Please read the assembly  
instructions carefully before  
commencing with the assembly  
of the antenna.

## ASSEMBLY INSTRUCTIONS

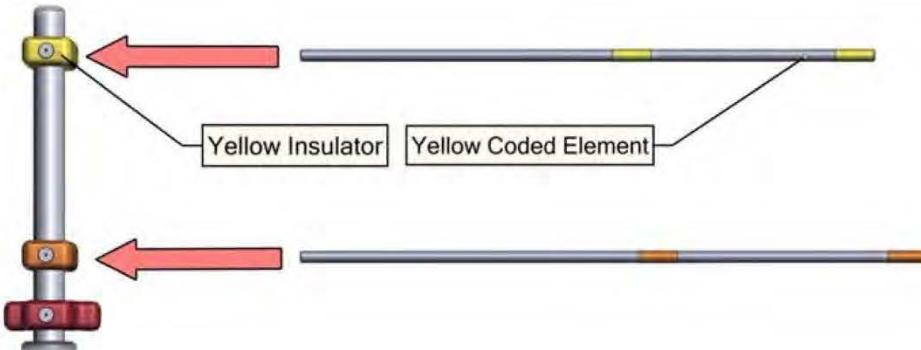

### STEP 1

Carefully remove content from bag. The following parts should be present.

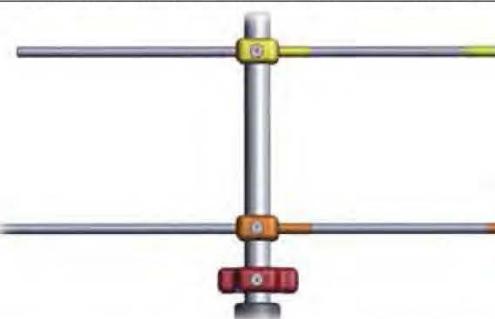

### STEP 2

Match the colour of each element to the appropriate colour insulator.

### STEP 3

Push each colour coded element through the appropriate insulator hole, until the colour marker touches the insulator.

### STEP 4

Screw the 2 driven elements into the Red Insulator and finger tighten. Do the same with the 2 Black elements.

### STEP 5

**Not mandatory** (You may want to slightly bend the elements to get them parallel.)
